Mojave in Billet Silver Metallic

first-ever Trail Rated® pickup truck starts with 80 years of innovation

IN 1941, THE JEEP® BRAND OPENED THE DOOR TO AUTHENTIC CAPABILITY, AND EVER SINCE, IT'S BEEN MOVING THE WORLD FORWARD WITH INDUSTRY-CHANGING ENGINEERING INNOVATIONS THAT GIVE YOU PERMISSION TO GO ANYWHERE, DO ANYTHING.®

COMMAND-TRAC® 4x4 SYSTEM This part-time, shift-on-the-fly system divides torque 50/50 between front and rear axles, shifts smoothly at speeds up to 45 mph and has a 2.72:1 low-range gear ratio. Standard on Sport, Overland® and Mojave.

SELEC-TRAC® FULL-TIME 4x4 SYSTEM This proven system, with its active 4x4 transfer case, does all the thinking so you can enjoy the drive. It sends torque to the wheels with the most grip, providing continuous, optimum traction for all types of conditions. The Smart Lock feature keeps the system engaged during off-roading or slippery road conditions. Available.

ROCK-TRAC® 4x4 SYSTEM (shown) Rubicon® rides with this extreme 4x4 system. Its 4:1 low-gear ratio allows Gladiator Rubicon to crawl at a low speed for greater control and increases the amount of torque available at the wheels. Standard on Rubicon.

ROCK-TRAC FULL-TIME 4x4 SYSTEM This system offers the capability of Rock-Trac® with the added convenience of a full-time, active transfer case that can provide optimal traction over changing road conditions. Available on Rubicon.

the guts to get you there

SELEC-SPEED® CONTROL Manages vehicle speeds of 0.6 mph to 5 mph in 4-LO while traversing off-road terrain without requiring the driver to control the throttle or the brake. This helps the driver focus on steering the vehicle, letting Gladiator put the right amount of power or braking onto the ground. Available. Included with 8-speed automatic transmission.

HILL START ASSIST (HSA) Works to prevent Gladiator from rolling when starting on an uphill gradient. Standard.

SELECTABLE TIRE-FILL ALERT When you're airing down tires for off-road situations, the system will chirp the horn when a pre-selected pressure is reached. When you're adding air back, it chirps the horn upon reaching the recommended on-road pressure. Available.

WHEN THE GOING GETS TOUGH, JEEP® GLADIATOR GETS YOU WHERE YOU NEED TO GO. YOU'RE SUPPORTED WITH A FULL LINEUP OF FEATURES THAT HELP YOU MANAGE YOUR PROGRESS AND PROTECT YOUR VITAL PARTS WHILE KEEPING YOU INFORMED OF VEHICLE PERFORMANCE ALL ALONG THE WAY.

OFF-ROAD PAGES

Access real-time performance data like suspension travel or keep an eye on your tilt-and-pitch. In-depth vehicle diagnostics, including wheel turn, articulation and transmission temperature, all help to provide an optimized experience. Available.

STEEL BUMPERS Built with ultra-strong steel to take the punishment of the trails. The front bumper can accept a winch, features integrated LED fog lamps and has removable¹ end caps to help maneuver through tight spots. Available.

SKID PLATES All models feature up to four skid plates/bars, made from lightweight high-strength steel, to protect the underbody. Both Rubicon® and Mojave add heavy-gauge steel rock rails for rocker panel protection while Rubicon also includes rock rails mounted behind the rear wheels to protect the bed. Standard.

TOW HOOKS Every Gladiator gets two up front and at least one in back. The Rubicon model receives painted Red hooks and two rear hooks. Mojave includes two front and two rear tow hooks painted Orange for special distinction.

FORWARD-FACING OFF-ROAD TRAILCAM²

Mounted within the grille, provides an up-close view of the trail directly in front of your vehicle, helping you navigate over and around obstacles. Available on Overland®, Mojave and Rubicon models.

locked-in

TRU-LOK® DIFFERENTIALS Front and rear electronic-locking differentials deliver maximum torque to both wheels, maintaining forward momentum for the ultimate in 4x4 traction. An instrument-panel-mounted rocker switch can lock either the rear (on Mojave models) or both (on Rubicon® models) axles. Paired with Rock-Trac® 4x4 system on Rubicon models. New for the 2021 model year, the rear axle can now be locked in 4-HI.

OFF-ROAD+ When engaged, it automatically deciphers the type of terrain Jeep® Gladiator is operating on and makes adjustments to key systems, including throttle, Selec-Speed® Control, traction control and transmission shift mode, for optimal performance. If enabled in 4-HI, it tailors operation for higher-speed sand performance. If enabled in 4-LO, it adjusts operation for low-speed rock-crawling maneuvers. Standard on Mojave and Rubicon models.

FRONT SWAY BAR DISCONNECT SYSTEM Flip a switch and the sway bar can be disconnected in 4-LO and 4-HI, allowing the front suspension to travel up to an additional 30 percent. It reconnects automatically at speeds above 18 mph. Standard only on Rubicon models.
