THE ALL-NEW 2013 ALTIMA[®]

INTRODUCING THE MOST INNOVATIVE ALTIMA EVER.

Wouldn't it be cool if just taking an on-ramp gave you an adrenaline rush? Or imagine knowing you're free and clear before you made that lane-change. If the design of your seat made long trips feel less so. And your customized radio station came along for the ride. What if you even got a thumbs-up from the valet as you pulled away from the curb? The next time you get behind the wheel, everything will be different. Because we didn't just update the Altima, we changed everything about it. All for you. The all-new 2013 Altima. **Nissan. Innovation that excites.[™]**

**TODAY WILL CHANGE THE WAY
YOU DRIVE. FOREVER.**

Whether you're commuting to work or carving through the scenic route, Altima makes it all feel extraordinary. Its next-generation CVT transmission lets you ride a seamless wave of power – and serves up more miles per gallon. A new suspension design puts you in touch with the road, while new technologies help you take the wheel with more confidence. It's all of this and more, in a sedan that truly redefines what it means to drive.

**THE FEELING OF STOPPING.
AND LETTING THEM STARE.**

Altima's deep creases and dramatic lines had their origins on a designer's sketchpad. Their translation to sheet metal then required a commitment to exceptionally high standards of engineering. Building something average would have been easier, but on any average day, isn't it nice to have something that takes your breath away?

ZERO-GRAVITY® SEATS FOR COMFORT THAT'S OUT OF THIS WORLD.

Whether you're embarking on a cross-country road-trip or braving the daily commute, sitting in a car for too long can be fatiguing. To find a solution, Nissan engineers looked to the cosmos where astronauts float weightlessly in zero-gravity conditions.

Zero-gravity® Seats – In the weightlessness of space, humans tend to take a relaxed posture that minimizes stress on the body. To recreate this “neutral posture” when you're behind the wheel, Nissan designed a new, articulated front seat shape that offers continuous support from the pelvis to the chest, along with seat cushions that flex in response to your unique pressure points. The result is a seat that helps reduce fatigue, for drivers of all sizes.

Nissan Altima 3.5 SL Sedan shown in Beige Leather with optional equipment.

**EVEN THE WAY ALTIMA
WELCOMES YOU IS DIFFERENT.**

It all starts with the press of a button, and you in the comfort of your home. Because an available Remote Engine Start System lets you warm up or cool down your Altima from up to 195 feet away.¹ Now when you open the car door, it's as if Altima was expecting you. And with details like available Dual Zone Automatic Temperature Control, heated front seats and steering wheel, Altima's all-new interior makes you want to stay. Ready? Just press Altima's Push Button Ignition and you're on your way.

NISSAN CONNECTSM

YOUR MUSIC YOUR WORLD

ANY WAY YOU WANT IT.

Why settle for just the radio? By putting the latest technologies right at your fingertips, Altima gives you all you need for hours of endless entertainment. Rock on.

Streaming audio via Bluetooth[®]. Want to let your passengers play DJ? Just connect a Bluetooth[®]-enabled audio device to stream music wirelessly, from any seat in the car.¹

Pandora[®] radio capability. Looking for something new? Explore music based on your hand-picked favorites using Pandora[®] radio capability. Connect your Pandora[®]-equipped iPhone through the audio system to listen to Pandora[®] free internet radio and use the 'thumbs up' or 'thumbs down' icons to rate songs – all right in the display.

iPod[®]/USB input. Would you like to be able to listen to your own playlists or podcasts? With the available iPod[®]/USB input, you can. Plug in your iPod[®] or other portable MP3 player through the USB port and control it through Altima's audio controls.²

ALWAYS UP TO DATE.

Navigate your way through the concrete canyons, call up some friends, or use Google[®] services to find that new restaurant with NissanConnectSM as your guide.

Nissan Navigation System. Altima's available 7-inch touch-screen display offers NavTraffic and NavWeather for real-time advisories to keep you on the move. Plus over five million points of interest, so you'll always have something new to discover.^{3,4}

Points of Interest powered by Google[®]. Find that new restaurant in a snap. Based on the latest information, Google[®] Points of Interest lets you search for a location, even without knowing the name or category. Once you find it, select it and you're on your way.

Google[®] Send-To-Car. Send an address to your Nissan Navigation System from any computer. When you start the car and connect to the network, the directions will be delivered and loaded into your navigation system. Now, that's cool.^{3,5}

Hands-free text messaging assistant. Now you can receive and respond to text messages without ever touching your phone. With a press of a button, have your text messages read to you and answer with pre-loaded responses, all via voice recognition.⁵

BEST-IN-CLASS FUEL ECONOMY!

Extensive refinements to Altima's 4-cylinder engine and Continuously Variable Transmission help ensure it's as powerful and fuel-efficient as ever. With best-in-class fuel economy¹ and better acceleration than other top-selling midsize sedans,² you'll enjoy amazingly smooth power delivery as you breeze past the pump.

4-cylinder Engine. Choose the 182-hp 4-cylinder engine and get more than just spirited performance. A new intake system optimizes the opening of intake valves at high rpm to keep the torque curve flat, giving you smooth power while contributing to the best-in-class fuel economy.¹

Xtronic CVT® (Continuously Variable Transmission). Say goodbye to fixed gear ratios and hello to a new kind of CVT. In the newest version of our CVT, friction is reduced by up to 40% and the ratio coverage is increased to greater than that of some 8-speed automatics. What does that mean behind the wheel? Better acceleration and fuel economy, plus performance so smooth, it's like riding a continuous wave of power.

PUREDRIVE™ The 2013 Altima 2.5 wears the PUREDRIVE™ badge, meaning it meets or exceeds the industry-average US Federal CAFE standards for model-year 2016. The PUREDRIVE™ initiative is just one aspect of Nissan's commitment to developing more environmentally friendly transportation for all of us.⁴

V6 ENGINE

HORSEPOWER

AMAZING ACCELERATION.

What if your daily drive got an adrenaline boost? Altima's V6 engine not only gives you incredible acceleration, but its Xtronic CVT® features 3 modes for a more customized driving experience, including paddle shifters for some Formula 1-style action.

V6 Engine. Nissan's legendary 3.5-liter, 270-hp V6 engine treats you to sports-car like performance and a cool 31 highway MPG that keeps you right at home in the carpool lane.³ Part of the engineering magic is Continuously Variable Valve Timing Control System (CVTCS), which means power is always on tap – off the line, or passing – for a ride as thrilling as it is efficient.

Xtronic CVT® with Paddle Shifters. Customize your ride with 3 modes. Pick Drive for every day, Ds for a sportier "shift" feel, or go hands-on with the paddle shifters. Unique to the V6, the available paddle shifters are mounted right on the steering column, putting precise shifting control at your fingertips. No clutch needed. Just pull a paddle and your "gear" changes on command, giving you an experience that's the best of both worlds.

TAKING A CORNER WILL NEVER FEEL THE SAME.

Wouldn't it be cool if your car knew when you were cornering – and how to react to your commands? That's the kind of intuitive response we've engineered into every Altima. So you enter a corner with more confidence, and exit with a big grin.

Active Understeer Control. This innovative technology helps improve control when you take a corner. It reads the cornering situation and, if needed, will imperceptibly brake the appropriate wheel to help you steer through the turn.

Suspension. Altima's all-new rear multi-link suspension was designed for exceptional agility. You'll feel it especially in the corners, when the layout of the suspension allows the rear wheels to turn slightly to match the front – giving you the sensation of riding on rails.

Shocks. Altima's luxury sedan-inspired shocks significantly reduce vibrations for a smooth, flat ride. A rebound spring inside of each shock absorber makes for minimal roughness and more secure cornering, combining great performance with great ride comfort.

SAY HELLO TO INNOVATION THAT LOOKS OUT FOR YOU.

Whether you're changing lanes on the highway or deftly maneuvering your way into a parking spot, Altima's new available **Safety Shield Technologies** take advantage of the rearview camera and act as a second set of eyes, giving you a whole new way to double-check.¹

A. Blind Spot Warning. If another vehicle is detected in your blind spot area, an indicator appears in the driver's or front passenger's doors and on the Advanced Drive-Assist™ Display. Put your turn signal on, and the indicator flashes with a warning chime to alert you.²

B. Lane Departure Warning. If Altima detects that you're straying from your lane, the Lane Departure Warning system will give both a visual and audible alert. So smart, the system is designed to stop the warnings whenever your turn signal is engaged.³

C. Moving Object Detection. Shift into reverse, and the available next-generation RearView Monitor displays what's behind you. If it detects something moving by the rear of the vehicle when you're in reverse, it gives a visual and audible alert. And whenever you want a wider rear view, just push the camera button.¹

¹The RearView Monitor with MOD cannot completely eliminate blind spots and may not detect every object. MOD operates at vehicle speeds below 5 mph. Always check surroundings before moving vehicle. Not a substitute for proper backing procedures. Always turn to check what is behind you before backing up. ²The Blind Spot Warning System is not a substitute for proper lane change procedures. The system will not prevent contact with other vehicles or accidents or detect every vehicle or object around you. ³The Lane Departure Warning system operates only when the lane markings are clearly visible on the road and speed limitations apply. Refer to your Owner's Manual for more information.

CONFIDENCE AT EVERY TURN.

We're not just looking out for your safety, we're taking a stand. In addition to a comprehensive range of active and passive safety features, we incorporated Brake Override Technology ahead of others in the industry. Plus a class-exclusive Easy-Fill Tire Alert, so you know your tire pressure is good to go.^{1,2}

A. Vehicle Dynamic Control (VDC). A slick spot in a corner can suddenly have you going in a direction you didn't want. VDC, also known as stability control, monitors your steering and braking to help you maintain your steered path under certain conditions by reducing engine output and/or applying brake pressure to specific wheels.³

B. Traction Control System (TCS). Altima's power is wasted if all it does is spin the tires, so when the standard Traction Control System senses drive-wheel spin, it responds by reducing throttle or applying brake pressure to help maintain traction.

C. Anti-lock Braking System (ABS). The standard ABS pumps the brakes faster than you possibly can in panic-braking situations to help prevent wheel lockup, so you can continue to steer around obstacles while braking heavily.

D. Brake Assist/EBD. If you need to slam on the brakes, Brake Assist detects how hard you're braking, and if it senses you are in an emergency, it will automatically help to apply maximum braking force. Electronic Brake force Distribution (EBD) is designed to send extra force to the rear brakes when there's additional weight in the back.

Brake Override Technology. Like every Nissan since 2005, Altima comes standard with Brake Override Technology. Designed to help slow down your vehicle and bring it to a safe stop in an emergency, it overrides accelerator input and reduces engine power when the accelerator and brake are applied simultaneously.

E. Tire Pressure Monitoring System. When your tire pressure is low, an icon illuminates on your dash to let you know. The available individual tire pressure display also indicates which tire is low on the Advanced Drive-Assist™ Display.⁴

F. Easy-Fill Tire Alert. When filling your tires, the class-exclusive Easy-Fill Tire Alert gives you a friendly beep of the horn when you've reached the right pressure.^{1,2}

Six Standard Air Bags. Dual-stage supplemental front air bags adjust their inflation rate, depending on the severity of impact and seat belt usage. If your front passenger seat is empty, an occupant-classification sensor deactivates that air bag. Standard front seat-mounted side impact supplemental air bags are built into the seats, so they move with you as you adjust your seat. Above, standard roof-mounted curtain side impact supplemental air bags provide head protection for front and rear outboard seat occupants.⁵

¹Ward's Upper Middle Sedan Class segment. 2013 Altima 2.5 S vs. 2012 competitors, excluding hybrids and diesels. ²Vehicle must be on for Easy-Fill Tire Alert to operate. ³VDC, which should remain on when driving except when freeing the vehicle from mud or snow, cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely. ⁴Tire Pressure Monitoring System is not a substitute for regular tire pressure checks. ⁵Air bags are only a supplemental restraint system; always wear your seat belt. Even with the occupant classification sensor, rear-facing child restraints should not be placed in the front-passenger's seat. Also, all children 12 and under should ride in the rear seat properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents. See your Owner's Manual for more details. Inflated air bags shown for illustration purposes only; actual coverage area may differ. Air bags deflate after deployment.

Nissan. Innovation that excites.TM

NISSAN ALTIMA[®] SEDAN

Shouldn't you drive something you love? Absolutely. And that's what inspires our innovation. We look at every part of your drive and ask how can we make this better, smarter and more fun. So when you get in your new Altima, you'll feel how exciting the answers can be.

High MPG. A best-in-class 38 MPG on the highway gets you 684 miles on a tank.¹ Bring snacks – you could get pretty hungry between stops.

Alert and aware. Available Blind Spot Warning system helps detect other vehicles, when you're changing lanes.²

Fast-thinking. The new Advanced Drive-AssistTM Display lets you scan info quickly, helping minimize time spent looking away from the road.³

Right on track. Active Understeer Control reads the cornering situation and works behind the scenes to help you steer through the turn.
