INTELLIGENT CRUISE CONTROL

Unlike traditional systems that only maintain a set speed, the available Intelligent Cruise Control also helps maintain an adjustable set distance between you and the car in front of you. As traffic slows down or speeds up, Murano can respond accordingly.⁵

¹PFCW is intended to warn you before a collision occurs; it cannot prevent a collision. Speed and other limitations apply. See Owner's Manual for details. ²FEB cannot prevent accidents due to carelessness or dangerous driving techniques. It may not provide warning or braking in certain conditions. Speed limitations apply. ³Blind Spot Warning is not a substitute for proper lane change procedures. The system will not prevent contact with other vehicles or accidents. It may not detect every vehicle or object around you.

⁴Not a substitute for proper backing procedures. May not detect all moving vehicles. Speed and other limitations apply. See Owner's Manual for details. ⁵Intelligent Cruise Control is not a collision avoidance system or warning device. Designed to use limited braking. Failure to apply the brakes could result in an accident.
